-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 21-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 11, 13, 14, 15, 18, 19, and 20 of U.S. Patent No. 6655861. Although the conflicting claims are not identical, they are not patentably distinct from each other because the application claims are broader versions of the patent claims and are therefore anticipated by the patent claims.

Application claim 1 is anticipated by patent claims 1 and 18.

Application claims 22-25 are anticipated, respectively, by patent claims 11 and 13-15.

Application claims 26-27 are anticipated by patent claim 19.

Application claim 28 is anticipated by patent claim 20.

Cited Art

The art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited prior art discloses various techniques of segmenting, extracting, or discriminating between character or line images, dot or halftone images, and/or photographic images where differences between average, minimum, and maximum density values of pixels in a local area are determined and used in the segmenting, extracting, or discriminating.

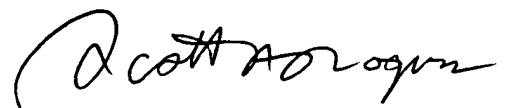

However, the prior art searched and of record neither anticipates nor suggests as set forth in the claimed combinations, the dot region detection and the low-linear-density dot region detection based on the number of peak pixels in the target region and neighboring regions.
